- JavaScript
- JSON and RESTful APIs
- React
- Redux
- Responsive Design
- Storybook
- TypeScript
- Unit Testing
- Version Control
- Web Accessibility

SOFT SKILLS

- Collaboration
- Creativity
- Emotional Intelligence
- Empathy
- Intercultural Competence
- Problem-Solving
- Project Management
- Verbal & Non-Verbal Communication

EDUCATION

Flatiron School
New York, NY
January 2018

Full Stack Web Development,
Ruby on Rails and JavaScript
immersive program

New York University
New York, NY

B.S. Sports Management and
Leisure Studies

WORK EXPERIENCE

Full Stack Web Developer, Web Platform
Freshly, Inc. | New York, NY

April 2019 - Present

- Orchestrate and implement a multi-approach plan to address digital accessibility gaps, including documentation of code standards, trainings, UI redesign, and the creation of a design system
- Lead the engineering effort to create a library of 30+ accessible, reusable React components; collaborate with the design team to explore use cases and anticipate edge case scenarios, and call attention to design inconsistencies and implementation complexities
- Develop and maintain React applications, including consumer-facing pilot launches and admin tools for demand planning and facility operations
- Established frontend team processes and standards for code architecture, development lifecycle, unit testing, and documentation
- Created internal scripting tools to streamline the component development process, such as a component boilerplate tool and a sync script to provide real-time cross-development between the component library package and the consuming applications
- Reduced bundle sizes by more than 50% in the meal selection app and optimized GraphQL queries for the demand planning application, resulting in a 1000% load time reduction

Associate - Projects (Software Engineer)
Cognizant Technology Solutions, Inc. | New York, NY

April 2018 - March 2019

- Developed software as an embedded contractor with a Fortune 100 financial institution upholding rigorous code standards across a large enterprise codebase
- Collaborated with product owners and designers to uplift legacy experiences, and transformed designs into accessible, responsive client-facing UI and scalable, reusable components using React and Redux
- Led a cross-product initiative to increase the accessibility of the web user interface implementing WCAG 2.1 standards

VOLUNTEER EXPERIENCE

Volunteer Instructor
Code Nation | New York, NY

October 2018 - March 2019

- Supported 11 high school students from under-resourced schools in building technical and professional skills needed to access careers in technology

Lead Volunteer, Mavens I/O Women in Tech Conference
We Build Black | New York, NY

February 2018

- Led team of volunteers at the inaugural conference for women in tech
